**Server:** Node.js, Express, API, AJAX, EJS

**Database:** MongoDB, Mongoose

## Experience

### Front-End Web Developer

*Oct. 2020 – Present*

Independent Developer, Greenwood IN.

- Knowledgeable of server-side and client-side design and development.
- Ability to create stable and maintainable code using HTML5, CSS3 and JavaScript.
- Created more than 10 working single page web applications which can all be seen through my Github link.

## Projects

### Blog Website

*June 2020*

<https://github.com/cblake35/Blog-Website>

- A blog website created using Node.js, Express and Embedded JavaScript Templating(EJS).
- A single page web application wherein a user can input a post with a title and a body, which is then saved in a database utilizing MongoDB.

### Newsletter Sign-Up

*May 2020*

<https://github.com/cblake35/Newsletter-signup>

- A single page newsletter sign-up page utilizing Node.js, MongoDB and Mailchimp API.
- Created a working newsletter mockup that registers a user and saves their information into the cloud.

### Restaurant Reviews App

*Nov. 2019 – Dec. 2019*

<https://github.com/cblake35/Restaurant-Reviews-App>

- Converted a static web application to be responsive and more accessible for screen reader users.
- Some of the technology used were JavaScript, Service Workers, Mapbox API and more.
